Dear [REDACTED]

Virus isolates: PHI/5/2003, PHI/10/ 2003, PHI/14/2003, PHI/17/2003, PHI/20/2003

Strain differentiation results for the above O FMD virus isolates received on 29th May 2003.

The following r_1 values were recently obtained by ELISA at the WRL. All of the viruses showed a good level of reactivity to O PHI-95, but only one to O Manisa. In view of the ambiguous nature of these results, some of the tests will be repeated by neutralisation instead of ELISA.

Yours sincerely

[REDACTED]
Head: World Reference Laboratory for FMD
